Model: SBA-685

Product: 2.5ton pallet jack

Description: The 2.5-ton pallet jack is a reliable and durable material handling tool designed for warehouses, factories, and retail environments. Built for efficiency, this manual hydraulic pallet jack allows for easy lifting and maneuvering of pallets up to 2,500 kg (2.5 tons).

Features	Benefits
Heavy-Duty Steel Frame	Built to withstand tough industrial environments and heavy loads up to 2.5 tons.
Ergonomic Handle Design	Comfortable, non-slip grip with an easy-to-use control lever for lifting, lowering, and neutral positioning.
Reinforced Forks	Sturdy fork structure ensures stability and durability under maximum load.
Durable PU Wheels	Provides smooth operation, reduces floor damage, and ensures quiet movement.
Compact & Maneuverable	Designed for tight spaces, making it ideal for warehouses, retail stores, and factories.
Low Maintenance	Reliable and easy-to-maintain design ensures long service life.
	Increases Productivity – Moves heavy loads quickly and efficiently, reducing downtime.
	Reduces Manual Labor – Minimizes strain on workers, enhancing workplace safety
	Easy to Operate – Simple and intuitive design requires minimal training.
	Cost-Effective – A durable and long-lasting solution for material handling without high maintenance costs.
	Versatile Application – Suitable for various industries, including warehousing, logistics, retail, and manufacturing.
	Protects Flooring – PU or nylon wheels prevent scratches and damage to warehouse floors.

Technical information	
Load capacity	2500 kg
Distance between fork arms	550 mm
Fork length	1150 mm
Fork lowered height	75 mm
Steering wheel diameter	Ø 180 mm
Fork wheel diameter	Ø 74 mm
